CID193-011329-5H9B/ 5K4

7. Report Summary:

This office was notified by the Clay County Sheriff's Office, 901 North Orange Avenue, Green Cove Springs, FL (CCSO), that SPC Mclemore was reported missing by the Florida National Guard.

CCSO reported SPC Mclemore went missing on 20 June 2018, while conducting land navigation training on Camp Blanding Joint Training Center, Starke, FL (CBJTC).

Chief (b)(6) (b)(7)(C) CCSO, reported SPC Mclemore was found deceased on 22 Jun 18 in a training area on CBJTC.

This office received the Office of the Medical Examiner, Jacksonville, FL 32206 (OME), autopsy protocol and toxicology report. The autopsy listed the manner of death of SPC Mclemore as accidental and reflected the cause of death as environmental heat exposure. The comprehensive drug screen reported ethanol in chest cavity, which was explained by Dr. (b)(6) (b)(7)(C) Medical Examiner, OME, as part of the decomposition process.

CID law enforcement reports may be subject to a Quality Assurance Review by CID higher headquarters.

8. Unique Circumstances:

Victim Position: NA
Subject Position: NA
Relationship: NA

DETAILS

BASIS FOR INVESTIGATION: While conducting personal use of Facebook, SA (b)(6) (b)(7)(C) observed a post from the Clay County Sheriff's Office (CCSO) which stated the Florida National Guard reported an unnamed Reserve Soldier was missing on Camp Blanding Joint Training Center, FL, while conducting land navigation training.

About 2050, 21 Jun 18, SA (b)(6) (b)(7)(C) this office, coordinated with Chief (b)(6) (b)(7)(C) Clay County Sheriff's Office, 901 N Orange Ave, Green Cove Springs, FL 32043. Chief (b)(6) (b)(7)(C) identified the missing Soldier as SPC Cayln A. Mclemore, (b)(6) (b)(7)(C) 326th Chemical Company, 490th Chemical BN, 415th Chemical BDE, Huntsville, AL. Chief (b)(6) (b)(7)(C) further stated the SPC Mclemore was conducting a land navigation course and was last seen in the early morning hours of 20 Jun 18, by two service members who requested he travel with them. The service members indicated SPC Mclemore refused and continued on the course. Chief (b)(6) (b)(7)(C) stated both SPC Mclemore's score sheet and map were found in the general vicinity of the land navigation course. Chief (b)(6) (b)(7)(C) stated they had tried to ping SPC Mclemore's cell phone which met with negative results, further they have conducted grid searches, air search's, and all assigned active personnel assigned to Camp Blanding were assisting in the ground search. Chief (b)(6) (b)(7)(C) stated at this point there was nothing needed from CID and he would contact this office if anything changed.

About 0922, 22 Jun 18, SA (b)(6) (b)(7)(C) this office, coordinated with Ms. (b)(6) (b)(7)(C) CCSO, who provided their case number as 2018015671, and stated SPC Mclemore was listed on NCIC, but not in NamUs, and her office conducted multiples attempts to ping SPC Mclemore's phone: Not Active. Ms. (b)(6) (b)(7)(C) stated at this time due to the limited resources of this office they did not need any assistance; however, she would pass contact information to the personnel on Camp Blanding.

About 1010, 22 Jun 18, SA (b)(6) (b)(7)(C) coordinated with COL (b)(6) (b)(7)(C) CDR, Regional Training Institute (RTI), Camp Blanding, FL. COL (b)(6) (b)(7)(C) indicated SPC Mclemore was attending the Basic Leaders Course and scheduled to graduate on 26 Jun 18. COL (b)(6) (b)(7)(C) reported SPC Mclemore was on title 10 orders, stationed out of Alabama, and there were over 500 people searching for him.

About 1045, 22 Jun 18, SA (b)(6) (b)(7)(C) submitted the information for SPC Mclemore into NamUS, Case MP5730.

About 1119, 22 Jun 18, SA (b)(6) (b)(7)(C) coordinated with 1LT (b)(6) (b)(7)(C) CDR, 326th Chemical Company, 490th Chemical Battalion, 415th Chemical Brigade, 76th ORC. 1LT (b)(6) (b)(7)(C) indicated he was the CDR of SPC Mclemore and was aware he was missing. 1LT (b)(6) (b)(7)(C) stated he had spoken with SPC

Mclemore during their last drill which he stated was from 1-3 Jun 18. 1LT (b)(6) (b)(7)(C) further indicated SPC
Mclemore reported to BLC on 4 Jun 18, and was scheduled to graduate on 26 Jun 18. 1LT (b)(6) (b)(7)(C)
stated he did not have much contact with SPC Mclemore however it did not appear as if he had any
suicidal ideations. 1LT (b)(6) (b)(7)(C) stated SSG (b)(6) (b)(7)(C) squad leader, and SFC (b)(6) (b)(7)(C) had
more communication with SPC Mclemore. 1LT (b)(6) (b)(7)(C) stated SFC (b)(6) (b)(7)(C) training NCO, would be able
to confirm is SPC Mclemore drove to school.///LAST ENTRY///

DETAILS

About 2030, 22 Jun 18, SA (b)(6) (b)(7)(C) SAC, was notified by SA (b)(6) (b)(7)(C) that SPC
Mclemore's remains had been discovered.

About 2042, 22 Jun 18, SA (b)(6) (b)(7)(C) coordinated with Chief (b)(6) (b)(7)(C) CCSO. Chief (b)(6) (b)(7)(C) confirmed
the remains of SPC Mclemore had been discovered. Chief (b)(6) (b)(7)(C) stated the remains had been
recovered and transferred to the Medical Examiner's Office for an autopsy. Chief (b)(6) (b)(7)(C) stated at this
point there did not appear to be any foul play suspected. Chief (b)(6) (b)(7)(C) further stated at this time there
was nothing required of this office.

About 2100, 22 Jun 18, SA (b)(6) (b)(7)(C) closed the request for a missing person on NamUS.

About 1001, 25 Jun 18, SA (b)(6) (b)(7)(C) coordinated with Mr. (b)(6) (b)(7)(C) Medical Examiner's Office,
District # 4, Jacksonville, FL, who confirmed his office received the request for a copy of the Autopsy
and the Toxicology Report and will provide those documents as soon as they are available.

About 1029, 25 Jun 18, SA (b)(6) (b)(7)(C) coordinated with Mr. (b)(6) (b)(7)(C) Chief of Accident
Investigations, Army Safety, Army Combat Readiness, Fort Rucker, AL, about the collateral
investigation. Mr. (b)(6) (b)(7)(C) reported Mr. (b)(6) (b)(7)(C) Ground Mishap Investigator, begun the
safety investigation of the incident.///LAST ENTRY///

DETAILS

About 1424, 10 Jul 18, This office received the Office of the Medical Examiner, Jacksonville, FL 32206, autopsy protocol and toxicology report. The autopsy listed the manner of death of SPC Mclemore as accidental and reflected the cause of death as environmental heat exposure. The comprehensive drug screen reported ethanol in chest cavity fluid.

About 1531, 10 Jul 18, SA (b)(6) (b)(7)(C) coordinated with Dr. (b)(6) (b)(7)(C) Medical Examiner, Office of the Medical examiner, Jacksonville, FL 32206, who related she was unable to collect blood from normal places due to the decomposed stated of the body, so she collected from the chest cavity fluid. Dr. (b)(6) (b)(7)(C) stated the decomposition process can result in a small amount of ethanol.

About 1400, 17 Jul 18, SA (b)(6) (b)(7)(C) coordinated with Mr. (b)(6) (b)(7)(C) who reported the Army Safety investigation did not find anything to indicate criminal activity; however, their report was not releasable under DODI 6055.07 and AR 385-10.///LAST ENTRY///

EXAMINATION REPORT

NAME OF DECEASED: MCLEMORE, Caylin Antonio
M.E. NO.: 18-1356
DATE OF DEATH: Found June 22, 2018
DATE OF AUTOPSY: June 23, 2018
TIME OF AUTOPSY: 1:00 PM
COUNTY OF DEATH: Clay

EXTERNAL EXAMINATION:

The body is that of a 5.0 foot, 10.0 inch, well-nourished 159-pound black male appearing the stated age of 25 years. Rigor is passed in the decomposed body and posterior lividity is noted. The hair is slipped secondary to decomposition, the residual hair is short, black and kinky. The color of the irides is not discernible as the soft tissue of the eyes is decomposed. Dentition is natural and in good condition. The external genitalia are those of a circumcised adult male and both testes are intrascrotal. There are no needle track marks or wrist scars. There are no tattoos on the body. Small maggots are on the face, in the orbits and in the mouth. Fly eggs are adherent to the clothing. There is no evidence of ante-mortem injury. There is no evidence of acute medical intervention.

A postmortem 3.0 centimeter ragged defect is on the dorsal aspect of the right wrist exposing the subcutaneous soft tissue. A 3.0 centimeter oval defect is on the posterior lateral aspect of the left forearm adjacent to the elbow exposing the subcutaneous soft tissue.

Clothing consists of a military uniform shirt removed from the decedent and placed on the anterior aspect of the body, a military uniform pair of pants, gray hanes jockey underwear, a gray uniform belt, forest green socks and brown army boots. A United States Flag is draped over the body bag.

INTERNAL EXAMINATION:

The scalp does not show galeal or subgaleal hemorrhage. The calvarium and base of skull are intact. There is no epidural, subdural, or subarachnoid hemorrhage. The 1530-gram brain is markedly edematous, gray, soft and decomposed. The cranial nerves are within normal limits apart from decomposition. The cortical ribbon is gray. There is no white matter hemorrhage. The

EXHIBIT 7

Page 2 EXAMINATION REPORT

18-1356 MCLEMORE, Cayln Antonio

substantia nigra is grey. The Ammons horns do not show sclerosis. The ventricles are normal apart from decomposition. The pons, midbrain, cerebellum, and medulla are unremarkable apart from decomposition. The vessels at the base of the brain do not have aneurysms or vascular malformations.

The tongue is red/brown and homogenous. The soft tissues of the neck, hyoid bone, thyroid cartilage, and cervical spine are all intact.

The pericardial, pleural and peritoneal cavities do not have adhesions. Approximately 100 cubic centimeters of blood stained fluid is within each chest cavity secondary to decomposition. This sample is sent for toxicology testing.

The 313-gram heart has a smooth glistening epicardial surface and a soft flabby pale brown myocardium. The free wall of the left ventricle and the interventricular septum measure 1.0 centimeter and 1.2-centimeters, respectively. There is no hyperemia or fibrosis in the pale brown myocardium. The endocardium and heart valves are without note. The foramen ovale is patent and valvar. The tricuspid valve is 10.5-centimeters, the mitral valve is 10.0-centimeters, and the pulmonic and aortic valves are 8.0-centimeters and 7.0-centimeters, respectively. The coronary artery supply is of the right dominant type. The vessels are medium-size and widely patent. The aorta has dark pink intimal surface secondary to decomposition.

The right and left lungs are 556-grams and 489-grams, respectively. The pleural surfaces are smooth and glistening. Both lungs are gray, atelectatic and soft secondary to decomposition. Abundant bloodstained fluid exudes from the parenchyma and into the airways. The lumen of the larynx and trachea contains scant bloody fluid. The peritracheal lymph nodes are black. The pulmonary artery and veins are free of emboli and thrombi. The postmortem blood is unavailable because of decomposition.

The 867-gram liver has a soft pale brown capsular surface and a pale brown semi firm cut surface. The gallbladder contains approximately 6.0-cubic centimeters of dark brown bile and the bile passages are patent. There are no calculi. The 75-gram spleen has a dark purple capsular surface and a dark purple soft cut surface. The pancreas is tan/brown, lobulated, and free of abnormality apart from decompositional change.

The right and left kidneys are 98-grams and 115-grams, respectively. The dark brown cortical surface is smooth. There is normal cortico-medullary definition. The calyces, pelves and ureters are without note. The urinary bladder contains approximately 5.0-cubic centimeters of dark brown urine and the mucosa is smooth and tan. The prostate gland is of the usual size and consistency. The testes are tan/brown and the parenchyma strings with ease.

The pharynx and esophagus are unremarkable and the stomach contains scant tan thick fluid adherent to the mucosa totaling less than 10 cubic centimeters. There is no pill residue. There is no aromatic odor from the gastric contents or from the viscera. There is a diffuse chyme column. The

Detailed Findings:

Analysis and Comments	Result	Units	Rpt. Limit	Specimen Source	Analysis By
Ethanol	58	mg/dL	10	001 - Chest Cavity Fluid	Headspace GC
Ethanol	Confirmed	mg/dL	10	001 - Chest Cavity Fluid	Headspace GC

Other than the above findings, examination of the specimen(s) submitted did not reveal any positive findings of toxicological significance by procedures outlined in the accompanying Analysis Summary.

Reference Comments:

1. Ethanol (Ethyl Alcohol) - Chest Cavity Fluid:

Ethyl alcohol (ethanol, drinking alcohol) is a central nervous system depressant and can cause effects such as impaired judgment, reduced alertness and impaired muscular coordination. Ethanol can also be a product of decomposition or degradation of biological samples.

Sample Comments:

001 Select testing may have been performed at 3701 Welsh Road, PO Box 433A, Willow Grove, PA 19080-0437

Unless alternate arrangements are made by you, the remainder of the submitted specimens will be discarded one (1) year from the date of this report; and generated data will be discarded five (5) years from the date the analyses were performed.

Analysis Summary and Reporting Limits:

All of the following tests were performed for this case. For each test, the compounds listed were included in the scope. The Reporting Limit listed for each compound represents the lowest concentration of the compound that will be reported as being positive. If the compound is listed as None Detected, it is not present above the Reporting Limit. Please refer to the Positive Findings section of the report for those compounds that were identified as being present.

Acocde 50010FL - Amphetamines Confirmation, Fluid - Chest Cavity Fluid
